

Thought to Finish

CONSTRUCTION

Stark Design and Development is a full service general contractor providing expertise in recreational, multi-family residential and commercial construction.

Working with a team of experienced professional engineers, construction managers and support staff, Stark Design and Development is able to assist in all aspects of the design and construction process to deliver the optimum building solution for our clients.

We work to deliver successful construction projects at a level of personalized service that is unparalleled in today's marketplace. Our level of service, performance and commitment separates Stark Design and Development from all others.

Whether we provide general contracting, design/build, or construction management services, we offer the capability to take even the most complex project from planning to completion, on schedule and within budget – all while maintaining the highest construction standards.

CIVIL ENGINEERING

Stark Design and Development is full service civil engineering company that provides innovative professional site engineering services for a wide range of projects. Our experience includes a variety of completed residential, commercial, industrial, recreation and institutional site developments throughout Ohio.

Our office works closely with the Owners, Developers, Architects and other design consultants in developing cost effective land planning and quality construction documents. We also assist the owner and their representatives in obtaining all necessary governmental permits and approvals for their project.

Stark Design and Development provides personal and professional service for every project, large or small. Our close coordination throughout the design and construction of the project ensures client satisfaction and enables our projects to be completed efficiently and on schedule.
